

Order Form

for "LUCHS IV" register measuring elements

Offset Printing (Valid as of March 2016)

There are different measuring element types which can be ordered as a set with three different set variations or ordered individually.

All measuring elements in the versions "Standard" or "Doubling-free" can be ordered simultaneously. The register measuring system must to be equipped with the option "measurement of structured measuring lines with the LUCHS IV register measuring system" in order to use the "Doubling-free" version.

All measuring elements will always be delivered in platesetter resolutions of 2400 dpi and 2540 dpi.

Please fill out one order form for each measuring element type!

(consists of one measuring element for the positions 2, 4, 8, 18 i.e. four measurement positions)

- Single elements

Position: _____

5. Prices (plus VAT):

The price per order form results from the required measuring element type price from point 3 multiplied by the number of measurement positions according to the set variation and the number of single elements. The price will be doubled when choosing both the "Standard" and "Doubling-free" variations.
