Geschäftsführer
Dr. Thomas Kaulitz

**Polygraphische innovative
Technik Leipzig**

In exciting panels and discussions, the participants share their visions for the future. Thanks to their broad and application-oriented focus, universities of applied sciences are unbeatable in quickly developing tailored solutions to socially relevant problems based on research results. Together with their partners from research and industry, they form a powerful engine for innovation and progress in Germany.

The Future Conference was not just about networking and cooperation, but also about how universities can position themselves strategically for the future and what career paths they can open up. In addition, there was a special focus on the topic of business start-ups and the start-up ideas the bright minds in the universities are developing.

The program was accompanied by an exciting exhibition in the rooms of the Congress Hall at the Leipzig Zoo, where the Sächsisches Institut für die Druckindustrie also presented its work together with its sister company, PITSID Polygraphische innovative Technik Leipzig GmbH.
